RE: Summerland RECOPE Program

Dear Sir/Madam,

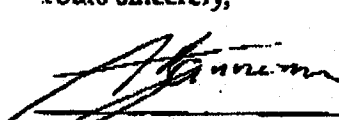

As the largest group medical practice in our community of Summerland, we would like to stress to you how vital the services the RECOPE program provides to our population, and would greatly appreciate any financial assistance you could provide to assist with the ongoing costs of running such a program.

We all consistently refer a number of patients each year both for water-based physiotherapy and for the dry-land program and we strongly believe in, and have witnessed, its amazing help for many of our frail, elderly population as well as younger clients rehabilitating from surgeries and injuries.

Many of our patients cannot afford private physiotherapy and the RECOPE program has been a godsend for us to be able to offer them affordable physiotherapy. Water based exercise has been hugely beneficial for patients who can't otherwise exercise due to debilitating arthritis or back issues. Their motto to help people "move better, feel better, live better" has been witnessed time and again and we are all firm supporters of the program and know how much the health of our patients have benefited from its existence. The volunteers are excellent and our patients love the social aspects of a regular exercise program and get an emotional as well as physical benefit from attending the programs at RECOPE.

Again we thank you in advance for considering financial support to our community RECOPE program here in Summerland.

Yours sincerely,

Alistair Bannerman
